50-Year Milestone Today

It was 50 years ago today on March 16, 1961 when headlines reported that Congress had appropriated funds to establish the "missile repair shop" at Heath. Licking County would see guidance system repair and metrology come to the place that is, today, the Central Ohio Aerospace and Technology Center. It was 21 months later when the community would see the Opening Ceremony for the Newark Air Force Station. Watch for more 50-year milestones between now and December 2012.

Horton Building Progresses

Will people in 2061 see 2011 as a milestone year for the Aerospace Center? The first personnel to move into the Horton Building are counting the days, not months now, until the construction is complete and the building is ready to occupy. The first floor office space for Goodrich will be the first to open for business. Stay tuned at the special Facebook page managed by the Port Authority's project managers.

Lobby Message Center: Want One?

The Port Authority's lobby has been the test site for a new message center system. Five tabs scroll through in 30 seconds with a greeting, weather info, ProjectCam view, Twitter message, and the latest public announcement. The new building will have two message centers in both the office and clean room lobbies. Since the platform is internet-based, the Port Authority can tailor a message center for any on-site use. Just ask.
