## Industrial Spec Building Takes Shape

Three sides of the Southgate Corporation's latest industrial spec building are up with steel set to arrive soon. The 50,000 sq. ft. building is being built on speculation by Southgate on Kaiser Drive. The project marks the fourth spec building in three years in the manufacturing corridor along St. Rt. 79. Combined with the xperion and MISTRAS Group projects, the building forms a trio of projects that makes Kaiser Drive and James Parkway the "hot corner" in Heath.

## 3D Printer Lab Coming Soon

The Horton Building Clean Room will serve as the home base for a new 3D Printer Lab available for use by customers of the Aerospace Center. The lab will be equipped to give engineers from Boeing, Bionetics, the Air Force, and UTC Aerospace Systems the ability to tinker and train on the use of this technology. The announcement of the lab's opening will come out via Twitter sometime in early October.

## Campus Projects In Full Swing

Bids are being sought for the revamp of the Western Bridge and North Entry to the Aerospace Center and a power supply building is being repurposed for use as a maintenance facility in hopes of opening the current maintenance facility for small business lease. The latest report on projects is online.
